Deck Boards

Our deck boards are made from high quality, slow-grown Redwood Pine. This slow growth produces tight, compact growth rings - giving you a stable deck board to build with. Our range of deck boards, in various sizes and profiles, are all FSC® certified.

All timber used outside the home can have a professional preservative treatment to maximise its lifespan. All our Outdoor Living treated timbers are produced using award winning Next Generation TANALITH® wood preservative. This high performance protection allows us to offer 15 years assured performance against decay and insect attack. For more information see back page.

1

1. 32 x 150mm Grooved & Reeded Reversible Deck Board

(27 x 144mm Finished size)
Lengths ranging from 3.0m to 5.4m

2

2. 32 x 125mm Grooved & Reeded Reversible Deck Board

(27 x 119mm Finished size)
Lengths ranging from 3.0m to 5.4m

3

3. 38 x 125mm Grooved & Smooth Deck Board (32 x 119mm Finished size)

38 x 150mm Grooved & Smooth Deck Board (32 x 144mm Finished size)

Lengths ranging from 3.0m to 5.4m.
3.6m and 4.8m lengths- available to order.

Decking

Extend your home into your garden...

Use our anti-slip decking
on steps to reduce
the risk of slipping...

Anti-Slip Decking

Timber decking can become slippery when wet. Our anti-slip deck boards are enhanced with aggregate inserts to help provide a secure grip even during the biggest downpour. These boards help provide peace of mind for those wanting the appeal of a natural timber surface without the risk of slipping.

4

**4. 38 x 125mm
Anti-slip Deck Board**
(32 x 119mm Finished size)
3.6m and 4.8m lengths.

**32 x 125mm
Anti-slip Deck Board**
(26 x 119mm Finished size)
3.6 and 4.8m lengths.

In addition to standard grey anti-slip aggregate, we also offer additional colours on a bespoke order basis.

Gripsure Aquadeck® is a unique development in non slip timber decking, allowing rain water to permeate through the board back into the watercourse below.

Available in a range of vibrant colours.

Features & Benefits

- The rubber crumb infill is soft underfoot
- Suitable for schools & playareas
- Quieter under foot
- No dangerous build up of water in the timber decking board

Any surfaces of treated timber revealed by cutting must be treated with a suitable brush-on end grain preservative to maintain the integrity of the preservative treatment. See back page.

Newels

- 1. Turned Newel**
82 x 82 x 1295mm
- 2. Chamfered & Beaded Newel**
82 x 82 x 1295mm
- 3. Contemporary Newel**
82 x 82 x 1295mm
- 4. Softened Edge Post**
ex 100mm x 100mm
2.4m, 3.0m and 3.6m lengths
ex 75mm x 75mm
2.4m and 3.0m lengths
Treated to Use Class 4.

Spindles

- 5. Blank Spindle**
41 x 41 x 895mm
- 6. Turned Spindle**
82 x 82 x 895mm
- 7. Stop Chamfered**
41 x 41 x 895mm

Rails

- 8. 38 x 100mm Universal Hand/Base Rail**
(32 x 78mm finished size)
2.4m and 3.6m lengths
includes ex 16 x 50mm fillet strip

Any surfaces of treated timber revealed by cutting must be treated with a suitable brush-on end grain preservative to maintain the integrity of the preservative treatment. See back page.

Decking Accessories

Add the finishing touch to your decking...

EVA-LAST®
INSPIRED BY NATURE, DESIGNED FOR LIFE.

Composite Decking

Designed to withstand even the most challenging conditions...

Introducing the latest in bamboo-plastic composite technology! Tested in some of the harshest climates and conditions in the world, this composite decking is built to withstand all that Mother Nature has to throw at it. The revolutionary capped surface technology gives one of the most hard wearing surface finishes available on the market. The surface will not expand and contract like other composites.

20mm x 140mm - 4.8m Lengths

Tiger Cove

Espresso Roast

Copper Canyon

Sapphire Silver

Spanish Saffron

Mossel Bay Grey

Infinity™

Infinity™ **HD**

Boards come with a 25 year guarantee.

These 4th generation composite boards are one of the most hard wearing, stain resistant, slip resistant and splinter free surface finishes available.

Accessories

Matching Utility/Fascia Board
12mm x 150mm 2.2m lengths

Available Colours:
Tiger Cove, Espresso Roast, Copper Canyon, Sapphire Silver

Fixing kits

5m² Starter Kits and 10m² Expansion Kits provide a concealed fixing system for the Eva-Last Composite decking.

Colour headed screws are available to match the decking for discreetly face fixing decking or the Utility/Fascia Board.

The natural varied colours of the boards mimic natural wood...

Thermowood®

Outdoor solutions
for luxurious cladding...

Decay and weather resistance are important characteristics for a cladding board. Thermowood® is an excellent choice for exterior cladding. It is manufactured with high temperature and steam making it naturally weather resistant and environmentally friendly.

Fence Posts

Create exceptional boundaries in your garden...

Fencing

Our timber supplier, SCA Merchant Services, has their own timber treatment facilities which utilise Next Generation TANALITH™ wood preservative. This advanced treatment ensures a long term protection against fungal decay and insect attack and provides a long and low maintenance service life.

With over 20 years proven performance, TANALITH™ is a unique formulation which is boosted with the very latest award winning BARamine™ technology. This innovative technology allows an even wider, more robust protection and a deeper and more effective penetration of the preservative into the timber - allowing it to be used with real confidence in a wide range of end uses.

High Pressure Treatment Process

1 Timber loaded into treatment vessel. Initial vacuum applied and the timber cells are evacuated of air. Vacuum held.

2 Cylinder flooded under vacuum with TANALITH wood preservative.

3 Hydraulic pressure applied, forcing the preservative deep into the structure of the timber.

4 Final vacuum extracts excess preservative solution, which is pumped back to storage.

5 Low pressure inside the timber draws in surface solution when vented to atmosphere. Treated timber is left to dry.

The controlled treatment process uses proven vacuum, high pressure technology and the resulting TANALISED™ timber has an appealing even green colour which gradually weathers to a honey brown and eventually a silver grey. Treated timber can be coated if desired - refer to coating manufacturer's guidelines for product suitability.

Tip

Any preservative treated timber surface exposed by cross cutting, drilling, notching or boring must be brushed with a suitable end-grain preservative to maintain the integrity of the treatment.

Confidence in our Treated Timbers

The high performance achieved with Next Generation TANALITH™ wood preservative combined with our professional treatment practices, means we can offer a 15 year assured performance on our Outdoor Living treated timbers - ask us for more details.
